PROFESSIONAL EXPERIENCES

Front-end Developer
Crazy Startup Studio | Casablanca, Hybride
Full-time | Jan 2022 - Present

CONTEXT :

Contributions to the following projects :

- Creation of an interface to manage internal tasks for Crazy Startup Studio.
- Development of a real-time dashboard for a fisheries research institute, enabling the monitoring and management of multiple buoys and their data.
- Implementation of a solution to manage employee information, track absences, and analyze performance in a healthcare organization.
- Design of an inventory management system for a distribution company.
- Development of a financial tracking tool for a financial services company.

ROLE / ACTIVITIES :

- Analysis of client and project-specific requirements.
- Development of interactive front-end user interfaces.
- Styling and theming using various CSS frameworks.
- Integration of APIs for data retrieval and display.
- Implementation of state management solutions for effective data handling.
- Development and execution of unit and integration tests to ensure code quality.
- Code review and continuous improvement to maintain high quality standards.
- Participation in scrum ceremonies.

TECHNICAL ENVIRONMENT :

- Front-End : React, Next.js, TypeScript
- Styling : Styled Components, Panda CSS, Tailwind CSS, Material UI
- Animation : Framer Motion
- Graphics : Chart.js
- Data Fetching : Fetch API, SWR
- State Management : Redux, Zustand, React Query
- Testing : React Testing Library, Cypress
- DevOps : Docker, GitLab
- Version Control : Git
- Methodologies : Scrum (daily stand-ups, retrospectives, sprint planning)
- Software Craftsmanship : TDD, Code Review, Refactoring
- Collaboration Tools : Jira, GitLab, Google Workspace
- IDE : Visual Studio Code

Front-end Developer
Upwork ǀ Casablanca, Remote
Freelance | Dec 2020 - Dec 2021

CONTEXT :

- Creation of a student activity tracking interface for a school, including absences, grades, and participation.
- Development of a dashboard for a small business to monitor daily sales and revenue.
- Creation of a personal task tracking interface to organize tasks by status (to-do, in progress, completed) and manage them efficiently.
- Design of a dashboard for an online retailer to track orders, returns, and product performance.

ROLE / ACTIVITIES :

- Analysis of client and project-specific requirements.
- Development of interactive front-end user interfaces.
- Visual and interactive design solutions tailored to project needs.
- Styling and theming using various CSS frameworks.
- Integration of APIs for data retrieval and display.
- Implementation of state management solutions for effective data handling.

TECHNICAL ENVIRONMENT :

- Front-End : React, Next.js, TypeScript
- Styling : Styled Components, Tailwind CSS, Sass, Material UI
- Animation : Framer Motion
- Graphics : Chart.js
- Data Fetching : Fetch API, SWR
- State Management : Jotai, Redux
- Testing : React Testing Library
- DevOps : Docker
- Version Control : Git
- IDE : Visual Studio Code
